Creative Solutions for Tough Problems

On some of the oldest geologic formations known to man, cataclysmic and glacial forces have shaped Maine's landscape.

The Soils of Maine hold many secrets, evolving over millennium and witnessed first by the Paleo-Indian settlers who scratched the earth with primitive wooden tools. The first European settlement was in 1604 at Popham Colony.

Soils are complex "living" systems that provide nutrients to plants and house many Organisms. An area's soil determines the kinds of plants that develop there, which in turn, determines the kinds of animals that make a home in that area. The Maine landscape is reflected in its soil.

Our State is blessed by abundant natural resources, a clean environment and creative people. Soil is important to Maine's natural resource base. The prosperity of vast forest, agricultural, urban and wilderness areas depends upon the quality of the land.

With Maine's rich history, we are now entrusted with the stewardship of its natural environment...

ENVIRONMENTAL SITE EVALUATION

"One Call Does It All"

(207) 441-9770

PO Box 2385
Augusta, Me. 04338
sil06@roadrunner.com
www.mainelandquality.com

RESIDENTIAL

- * Septic Designs
- * Environmentally Sensitive
- * Advanced Treatment
- * OBD relicensing
- * Lot Layout
- * Site Design

Difficult sites are no longer a problem

COMMERCIAL

- * Land Use Planning & Development
- * Site Permitting
- * Wastewater Disposal
- * Wetland Classification

Qualifications/Experience

- Soil Scientist
- Site Evaluator
- Wetland Scientist
- Waste Water Treatment
- Nutrient Management Planning
- Water Quality Sampling
- Aerial Photography & Surveying

- 19 Years Regulatory Experience
DEP Licensing
- 25 Years in Project Review and Developments

- Municipal, State & Federal
- Small, Medium & Large Developments

- Wetland Assessments, Design
Mitigation & Delineation
Vernal Pool Review

AGRICULTURAL

- * Soil Fertility Testing
- * Farm Composting
- * Waste Recycling
- * Erosion Controls
- * Storm Water Runoff
- * Farm Management

What can we do for you?
